Reactions!

Creative science investigations to inspire the whole class

The hands-on investigations in **Reactions!** are easy to set up and run, encourage children to think creatively and explore scientific principles for themselves.

Reactions! contains:

- more than 80 ideas for scientific enquiry investigations per book, all referenced to the *QCA Schemes of Work*
- structured teaching plans with background knowledge and practical hints for the non-specialist
- photocopiable 'recipes' for pupil investigations plus ideas for further investigations and home activities.

Get started

- See the sample pages on www.heinemann.co.uk/reactions
- Request the books on a 30-day free trial using the **On Approval Order Form** or online.
- A mixed-year book costs only £47.00. To order, see page 50 of the **Firm Order Form**.

Problem solving from Years 5-6
i-Teach Scientific Enquiry CD

i-Teach Scientific Enquiry

Teach your pupils scientific enquiry in a simple, fun and interactive way

Packed full of simulations, datasets and videos, you can easily slot these activities into your science lessons and bring them to life on your interactive whiteboard.

i-Teach Scientific Enquiry:

- has three mixed-year CDs that break down the key aspects of scientific enquiry into easy-to-teach sections
- includes 36 activities (six per teaching tool) on each CD that can be customised to hundreds of uses
- embeds ICT into science lessons
- is perfect for use on an interactive whiteboard or with a digital projector.

Get started

- See the sample activities on www.heinemann.co.uk/iteach
- Request the CDs on a 30-day free trial using the **On Approval Order Form** or online.
- A mixed-year CD costs only £75.00 (single user). To order, see page 50 of the **Firm Order Form**.
