

About this book	v
Chapter 1: Movement and Position	1
Chapter 2: Forces and Shape	12
Chapter 3: Forces and Movement	23
Chapter 4: Momentum	34
Chapter 5: The Turning Effect of Forces	42
Chapter 6: Astronomy	49
Chapter 7: Mains Electricity	59
Chapter 8: Electric Charge	66
Chapter 9: Current and Voltage in Circuits	74
Chapter 10: Electrical Resistance	82
Chapter 11: Properties of Waves	91
Chapter 12: Using Waves	99
Chapter 13: Light Waves	107
Chapter 14: Sound	118
Chapter 15: Energy Transfers	127
Chapter 16: Thermal Energy	133
Chapter 17: Work and Power	142
Chapter 18: Energy Resources and Electricity Generation	150

Section A: Forces and Motion

Section B: Electricity

Section C: Waves

Section D: Energy Resources and Energy Transfer

**Section E:
Solids, Liquids and
Gases****Section F:
Magnetism and
Electromagnetism****Section G:
Radioactivity and
Particles****Appendices**

Chapter 19: Density and Pressure	162
Chapter 20: Solids, Liquids and Gases	169
Chapter 21: Magnetism and Electromagnetism	179
Chapter 22: Electric Motors and Electromagnetic Induction	187
Chapter 23: Atoms and Radioactivity	199
Chapter 24: Radiation and Half-life	209
Chapter 25: Applications of Radioactivity	216
Chapter 26: Particles	226
Appendix A: Experimental and Investigative Skills	234
Appendix B: Electrical Circuit Symbols	242
Appendix C: Formulae and Relationships	243
Appendix D: Physical Quantities and Units	245
Index	246
