A small bit of small print

Edexcel publishes Sample Test Materials on its website. This is the official content and this book should be used in conjunction with it. The questions in this book have been written to help you practise what you have learned in your revision. Remember: the real test questions may not look like this.

Online test preparation

GUIDED

1 Match the icons with the correct statements. One has been done for you.

Online test tools

Explain the use of the following test tools during your test. (a) **(b)** You are asked to organise a time plan for a day of events. Playground Story time Drawing Games Nap Session 1 Session 2 Session 3 Session 4 Session 5 Group A Group B Group C Group D You decide to move 'Story time' to Session 1, Group A. How do you do this? You are asked to place the home cinema on a plan so that it covers an area of 3 squares by 2 squares. home How would you do this? cinema How do you change the position of points on a line graph?

Using the onscreen calculator

GUIDED	1	Use your calculator to work out the value of these calculat press and the answer you get.	ions. Write down the buttons you

	5	The table gives	s information abou	ut the prices of t	five houses.		
		House	A	В	C	D	E
		Price	£326,500	£278,499	£289,995	£326,550	£289,905
		Write down th	e prices of the ho	uses in order, sta	arting from the l	east expensive.	

Negative numbers

CUIDED

1 Write down the smallest and the largest number in each list.

(a)
$$-4, -3, -8, -2, -9$$

smallest: largest:

smallest: largest:

On a number line, the numbers get **smaller** as you go to the **left**.

GUIDED

Write the following numbers in order from smallest to largest.

–13

3 This table gives information about the melting and boiling points of five chemical elements.

Element	Chlorine	Hydrogen	Mercury	Nitrogen	Oxygen
Melting point (°C)	-102	-260	-39	-210	-219
Boiling point (°C)	-34	-252	356	-196	-183

Write down the name of the element that has:

- (a) the lowest boiling point
- (b) the highest melting point.
- 4 David writes down his bank balance at the end of each month for the first 6 months of the year.

Month	Jan	Feb	Mar	Apr	May	Jun
Balance (£)	-127	-48	-579	-383	-326	-398

Write down the months in order, starting with the most overdrawn and finishing with the least overdrawn.

Adding and subtracting

GUIDE

Simon received £325 on his birthday. He spent £179 on booking a holiday. How much money does he have left?

£325 - £179 = £...

2	There are 54 children on the pirate ship at a fairground. When
	the pirate ship stops, 38 children get off and 26 children get on
	How many children are now on the pirate ship?

Subtract the number of children who get off and add the number who get on.

Carl buys some electrical items online. He buys a television costing £395, a DVD player costing £196, a sound bar costing £239. The electrical store charges £28 for delivery.

What is the total cost of the goods including the delivery charge?

£395 + £196 +

4 Part of this receipt is missing.

David gave the shopkeeper £750 and received £5 change.

David works out that the table must have cost £329

Look at the receipt. Is David correct? Explain your answer.

Sofa	£387
Rug	£129
Table	£

5 At the beginning of January, Mark had £1,840 in his bank account.

This table shows information about the amount of money he has withdrawn each month for four months.

Month	Jan	Feb	Mar	Apr
Withdrawn (£)	478	329	395	472

How much money is left in his bank account?

Checking your answer

GUIDED

Use estimation to check whether the following statements are likely to be correct.

If the number is between 10 and 99, round to the nearest 10

If the number is between 100 and 999, round to the nearest 100

(a) 68 + 93 = 161

$$70 + 90 = 160$$
 so 161 is likely to be correct.

(b) 438 - 59 = 379

(c) 672 + 543 – 283 = 932

2 Use inverse operations to check if the following statements are correct.

(a) 600 - 319 = 281

.....

(b) 550 + 254 = 804

(c)
$$963 \div 3 = 312$$

- (d) $211 \times 12 = 252$
- Alice worked out that the answer to $81 \times 29 \div 41$ is 57 to the nearest whole number. Use estimation to decide whether she is likely to be correct.

4 Part of Leon's bank statement is shown below.

	Debit	Credit
balance brought forward		£841
restaurant	£78	
football tickets	£167	

Leon has lost the page which shows his current balance. He wants to pay for a holiday that costs £428.

Use estimation to decide whether he has enough money in his account to pay for the holiday.

Fractions

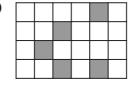

GUIDED

1 Write down what fraction is shaded and what fraction is not shaded.

The denominator should be the total number of shapes.

shaded =

unshaded =

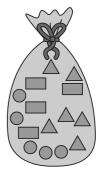

2 James has a bag of shapes.

What fraction of the shapes are:

3 Simran is making a cake. She needs $\frac{1}{3}$ of a kilogram of sugar. She can buy packets of sugar in the following sizes: $\frac{1}{2}$ kg, $\frac{1}{5}$ kg and $\frac{1}{4}$ kg.

What size of packet should she buy to ensure that she has enough sugar?

4 A box contains chocolates. There are $\frac{27}{80}$ square dark chocolates and $\frac{17}{80}$ round milk chocolates. There are 40 dark chocolates and 40 milk chocolates.

Complete the table.

	Square	Round	Total
Dark			
Milk			
Total			

Equivalent fractions

GUIDED	1	(a)	What fraction of this shape is shaded?
			Write your answer as two equivalent fractions.
		(b)	Shade $\frac{2}{3}$ of this shape.
	2	On	the grids below, shade $\frac{3}{4}$ and $\frac{4}{5}$. Which is the smaller fraction?
		The	e smaller fraction is
	3	Whi	ich fraction is larger, $\frac{3}{5}$ or $\frac{2}{3}$?
		•••••	
		•••••	
	4		na had a pizza that was cut into 8 equal slices. She ate 3 of them. Bill had a pizza that was same size, but his was cut into 4 equal slices. He also ate 3 slices.
		Who	o ate more pizza, Anna or Bill?
		•••••	
		•••••	
	5		ring a practice session, a trainer asks athletes to jog a certain number of laps. ah jogged $\frac{3}{4}$ of the laps. Jason jogged $\frac{3}{5}$ of the laps. Tim jogged $\frac{1}{2}$ of the laps.
		Ord	ler the fractions from smallest to largest.
		•••••	

Mixed numbers

GUIDED

1 Change each mixed number into an improper fraction.

(a)
$$3\frac{1}{5}$$
 $\frac{5 \times 3 + 1}{5} = \frac{\Box}{5}$

(b)
$$2\frac{1}{3}$$

(c)
$$5\frac{1}{7}$$

GUIDED

2 Change each improper fraction into a mixed number.

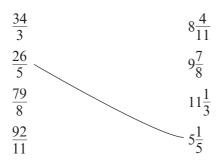

(a)
$$\frac{11}{2}$$
 11 ÷ 2 = 5 remainder 1 so $\frac{11}{2}$ = 5 $\frac{11}{2}$

(b)
$$\frac{11}{5}$$

(c)
$$\frac{41}{4}$$

GUIDED

3 Draw lines to match the equivalent fractions. One has been done for you.

4 For each pair of fractions, write down which is smaller.

(a)
$$\frac{10}{3}$$
 or $3\frac{1}{4}$

(b)
$$\frac{6}{5}$$
 or $1\frac{2}{5}$?

5 Tania thinks that $\frac{11}{9}$ is the same as $1\frac{1}{8}$.

Is she correct? Explain your reasoning.

Yves shares a bag of 30 sweets with his friends. He gives Mandy $\frac{2}{5}$ of the sweets. He gives Sam $\frac{1}{10}$ of the sweets. He keeps the rest for himself.

How many sweets does Yves keep for himself?

Mandy gets
$$\frac{2}{5} \times 30 = \dots$$

Sam gets
$$\frac{1}{10} \times 30 = ...$$

Yves keeps 30 -

2 Lewis wants to buy a new pair of trainers. There are two shops that sell the trainers he wants.

Sport4life

 $\frac{2}{5}$ off the usual price of £65

Trainers Limited

$$\frac{3}{10}$$
 off the usual price of £60

He wants to pay as little money as possible.

From which shop should he buy the trainers? Give your reasons.

3 Robert wants to buy some concrete posts. He finds two companies on the internet.

Cheap Posts

£12 each

Buy 10 and receive $\frac{1}{6}$ off.

Fence World

Buy 5 posts for £70 and

receive
$$\frac{1}{4}$$
 off.

Robert needs to buy 10 concrete posts.

Which shop should he buy from?

Remember to show all your working and write a conclusion.

4 If Elaine uses her railcard to buy a ticket at the station she will get a third off the normal price. The normal price of the ticket at the station is £48. If she books a ticket online she can get one fifth off the normal price. The normal price of the ticket online is £45.

Elaine wants to pay the smallest amount of money possible. Should she use her railcard or book online?

Decimals

	1	In words, write the value of the given digit in each of these numbers.			
		(a) 8 in 19.84			
		(b) 9 in 0.694			
		(c) 3 in 10.703			
GUIDED	2	Write the following numbers in order of size, starting with the smallest. Start with the lowest number.			
		3.2 6.4 6.2 12.8	1.4	owest number.	
		1.4			
	3	Order the prices from smallest to large	est.		
		£15.40 £15.04 £15.05 £15.	.50		
GUIDED	4	A scientist measured the lengths of some insects in centimetres. Order the lengths from smallest to largest.			
		0.71 0.711 0.713 0.7	0.06		
		0.06			
	5	A plumber weighed some copper in kilograms to take to the scrapyard. Order the weights from smallest to largest.			
		10.83 10.8 10.825 10.779	10.88		
				······································	
	6	For each pair of numbers, decide which number is larger.			
		(a) 12.8 and 12.567			
		(b) 15.927 and 15.94			
		(c) 9.004 and 9.04
