ALWAYS LEARNING

Learning through practice

We recognise that GCSE PE is popular with students who enjoy

active learning. That's why both our Edexcel GCSE (9-1) Physical Education qualification and our brand-new published resources are designed to enable all students to further their understanding of the subject though practical application.

The top 4 things to know about our new resources...

ActiveLearn **Digital Service**

Specifically written to support the new specification

Our new resources are organised in the same way as the **Edexcel GCSE (9-1) PE specification**, covering all four components of the course in a practical and engaging way. Each component is divided into main topics that guide you through the content of the course, supporting the development of skills students will need for their written exams and practical assessments.

Applies theory to practical sporting contexts

We provide lots of examples of how to put the theory into context and encourage students to apply their knowledge to practical performance in a physical activity or sport. For example, students can learn about the skeletal system by exploring how Tom Daley's body changes shape during a dive. This focus on the application of knowledge will support students in the written exam, in particular with the extended writing questions.

Includes new features to support learning through practice

We know students learn best if they put the theory into practice straightaway. Our resources include new features designed to build students' practical skills and reinforce the message that theory isn't boring - it's what real sportspeople need to know in order to give their best performance.

Supports exam preparation and revision with sample answers and commentaries

Dedicated exam preparation sections in the Student Book give tips and guidance for exam success, including example questions and answers to help students understand how to write better answers and achieve more marks. End-of-topic summaries also act as handy checklists for revision.

qualification on pages 6-7.

Remember not to use abbreviations such as pecs for pectorals, abs for abdominal, glutes for gluteals or quads for quadriceps when you write answers in the exam. Try to use the correct terms when you are speaking too, as this will get you used to doing it correctly and help make sure you do not slip up in the exam
